

ABOUT US

The Industrial Safety Training Council is a 501(c)3 Non-Profit training and education organization located in Southeast Texas. With locations in Baytown and Beaumont, Texas, ISTC delivers safety training and site-specific job safety orientations to contractors and employees across the nation.

The organization is firmly entrenched in the Petrochemical and Refining industry. ISTC responds to the challenge of these industries by combining their acquired knowledge of regulatory and compliance standards within the industries with their expertise in training. This results in reductions in cost while improving the quality of required training and documentation.

WHO WE SERVE

ISTC serves the petrochemical, refining, offshore, marine, pipeline, and energy facilities not only in Southeast Texas, but nationally. We are dedicated to providing excellence in training and compliance services in order to promote a safe and secure work environment for our clients and community.

BADGING SERVICES

PROXIMITY BADGES

ISTC partners with many industrial facilities throughout Southeast Texas to maintain their Gate Access Badging Program. These badges are used to gain security access to their facilities.

COMPANY BADGES

ISTC creates custom badges for several industries including police departments, fire departments, contract companies, and staffing agencies. Each badge is designed specifically for your company.

CRAFT BADGES

ISTC verifies individuals complete craft certifications. Each facility customizes their craft badge requirements through TLDR, NCCER, NCCCO, and other agencies.

TRAINING SERVICES

CUSTOM COURSE DEVELOPMENT

ISTC works closely with each client to create a custom computer-based training program that promotes a safe and secure work environment tailored to their specific needs.

ONSITE TRAINING

ISTC delivers classes offered by the safety council off-site to any location.

SPECIALIZED TRAINING

ISTC teaches several specialized training classes which include, but are not limited to: Excavation and Trenching Competent Person, Fall Protection Competent Person, and Scaffold Competent Person. These courses are available on-site at ISTC locations.

INSTRUCTOR LEAD TRAINING

AFTER-HOURS TRAINING

OTHER SERVICES

CONFERENCE CENTER

ISTC's conference center consists of several meeting rooms which include complimentary coffee, water, wi-fi, smartboards with corresponding podiums, refreshment area, and the latest technology to get the job done in a comfortable, inviting environment.

DISTANCE LEARNING

ISTC's online distance learning services are completely customizable and designed to provide a consistent platform for safety training, orientations, work policies, and procedures. All training is delivered with the regulatory and compliance expertise ISTC is known for.

OWNER COMPLIANCE TOOL

A compliance database is readily available in a central location for each owner facility. Updated in real time, it enables facilities to access and verify a contractor's credentials to ensure compliance is met at all times.

BACKGROUND SCREENING

ISTC currently offers the 2.0 graded background package through First Advantage, American Background, and S2Verify. Our background check services will ensure your facility will meet RBPS 12 Personnel Surety regulations

RECURRENT VETTING

ISTC provides the Department of Homeland Security with personally identifiable information of individuals working in a particular plant for the purpose of complying with the DHS Chemical Facility Anti-Terrorism Standards Program.

MANUAL CENTRAL

ISTC's Manual Central was created to maintain and distribute access of your company policies and procedures to authorize representatives 24/7.

Your Medical Home

Industrial Safety Training Council partners with Your Medical Home to deliver the highest quality occupational health services to our customers. Your Medical Home is here to provide complete coordinated case management for all industrial testing and medical needs. Your Medical Home's main goal is to provide a MEDICAL HOME for you and your business.
